Put more knowledge into your IT solutions

InterSoft, a. s. is a software company operating since 2001. The company is a spin-off of the R&D project funded by the EC within the 4th Framework Programme. The company was founded with intention to build on international experience of Finish and Slovak partners in software development, to exploit their international business contacts and capitalize the competitive advantages resulting from this partnership. Today, our main areas of activities are software development projects and the company works for large international companies, especially in Western and Central Europe.

Main business activities of the company are services in the field of analysis and development of the software. The InterSoft, a. s. presents innovative, efficient solutions at affordable prices. Our specialization is outsourcing of analytic and SW development works. We design and develop original applications or implement specific functionality to existing solutions. Our software solutions cover several fields of software technology applications, web and semantic technologies, knowledge management, artificial intelligence, sophisticated internet-based information systems etc. InterSoft offers also its own products and solutions – results of our previous projects. Our developers create, accommodate and install these solutions to any information environment and platform for you.

The members of our development teams possess extensive knowledge and long term professional experience with major programming environments and technologies, namely:

OS: Windows, Linux, Android, iOS, Windows Phone 8, OS X; **Programming languages:** Java (SE, EE), C, C++, Objective C, C#, Python, Groovy, GNU ASM, Scala, ABAP, Ruby (Rails), Pascal, LISP, PROLOG, Matlab;
Development environments: Eclipse, NetBeans, JUnit, MS .Net, MS Visual Studio, Xcode, ADONIS, SVN, Git; Python: web.py, numpy, scipy
Web technologies: HTML5/CSS3, JavaScript, JSP, ASP, PHP, EJB, Ajax, Axis, Apache Tomcat / TomEE / Ant / Hadoop / Mahout, Velocity, Xerces;
DB technologies: SQL, MySQL, MS SQL Server, PostgreSQL, Oracle DB, ODBC, JDBC, Hibernate, MariaDB, Neo4j, Oracle NoSQL, MongoDB, OrientDB, Elasticsearch;
Semantic technologies: Protege, TopBraid Composer, WSMO Studio, Seasame, Jena, RDF(S), OWL, N3, SPARQL, OWL-API, OWLIM-SE, BigOWLIM, Allegro Graph, Jena TDB;
Other tools / technologies: UML, XML, XSD, JAX-WS/RS, Axis, RESTful, JSON, BaseX, OSGi, CXF, WSML, BPMN 2.0, distributed programming – sockets, network objects, CORBA, Web Services, Heroku Cloud Platform, SOA, Model Driven Architecture, Internet of Things, Machine to Machine;

All developers have MSc or PhD degree, most of them affiliated with the Technical University of Košice. Staff members have participated in several international EU funded R&D projects, e.g. in the area of knowledge management, Internet of Things, embedded systems, semantic middleware, or e-Government. The staff is fluent in English (some of them also in German, Hungarian, Russian, Czech and Serbian), is able to work towards deadlines, has project management skills and experience in working in international teams. Some of the staff members have also experience with on site working in many European countries. The company is able to create on demand flexible development teams consisting from 2 up to 20 people.

The InterSoft, a. s. is committed to providing tailored software solutions at affordable prices. We offer a wide range of flexible subscription and technology integration plans.
